Icefire is the second book in The Last Dragon Chronicles series by Chris D'Lacey. David Rain, a college student who specializes in geology, has been accepted for a trip to the Arctic that is lead by a guy named Anders Bergstom, a presenter at David's college. When David returns home from his field trip, he learns that his landlady's daughter, Lucy, has been kidnapped and taken to a different part of the Arctic. David leaves right away for the Arctic, but when he gets there he meets a great enemy. Lucy is in the Tooth of Ragnar, which is an old land form that was created during a time of war. It is David's responsibility to rescue Lucy and bring her back home. Will David rise out on top or will he fall victim to the Icefire, the fire that melts no ice? Will he conquer the enemy like before, or will this adventure be different?
